Your Hosts

Your hosts will provide you with both information on game play and common aspects of a classic RPG, as well as some of the quirks of Dusty Tome games.

Sasha

Friendly, polite, and informative, this highly advanced AI is always more than happy to provide information on any subject.

She is very good friends with both Margoe and Raven, but she often fails to notice their antics.

Margoe

Diminutive and enthusiastic, Margoe is actually much older than she appears. She is well versed in classic RPG tropes and always full of comments.

She likes to use her natural cuteness to her advantage - and to irritate her friend Raven.

Raven

Raven was roped unwillingly into assisting Sasha and Margoe with this tutorial. She generally has less tolerance for people (and especially newbs) than her cohorts do.

With her dark, cynical personality, she has little patience for Margoe's bubbly act and will never admit to anyone that these two are her friends.
